

SUZUKI-Farbcodes für Zweiräder

SUZUKI colour codes for two-wheelers

1. Erklärungen

Diese Liste ist keine Original-Information von SUZUKI, sondern wurde aus verschiedenen Quellen zusammengestellt. Sie erhebt keinen Anspruch auf Vollständigkeit und Korrektheit. Die dargestellten Farben sind beispielhaft und entsprechen nicht den Originalfarbtönen. Änderungs- und Ergänzungsvorschläge bitte an den Webmaster von www.gs-classic.de.

SUZUKI-Teilenummern bestehen aus 2 Zahlenblöcken. Falls die Teile lackiert sind, wird noch eine entsprechende Kennung angehängt:
 09000-00000 Unlackiertes Teil
 09000-00000-000 Unlackiertes Teil
 09000-00000-019 Lackiertes Teil (hier 019 = Black)

Farben wurden nicht nur bei einzelnen Modellen verwendet, sondern teilweise über viele Jahre bei verschiedenen. Für denselben Farbcode wurden zum Teil unterschiedliche Namen gewählt (Beispiel: 264 = Pearl Orange, Summit Orange, Copper). Auch haben unterschiedliche Farbcodes manchmal denselben Namen (Beispiel: Candy Orange = 00Z und 138). Bestimmte Farben wurden auch nur für einzelne Märkte verwendet und teilweise der Name angepasst. Entscheidend für die Identifizierung einer Farbe ist stets der Farbcode. Steht im Code eine "0", wird dies bei verschiedenen Quellen auch mit dem Buchstaben "O" bezeichnet (Beispiel: 00A = OOA, Y09 = YO9). Steht im Code eine "1" am Anfang, wird dies bei verschiedenen Quellen auch mit dem englischen "I" bezeichnet (Beispiel: 1AC = IAC). Beim Suchen in dieser Liste also stets "0" und "1" verwenden.

Lieferquellen (Beispiele): X1234 Standox (standox.de)
 Sources (examples): 12-3456 R.H. Lacke (motorradlacke.de)
 F1234 - W1234 Dupont
 12345 BASF

Explanations

This list is not a genuine information of SUZUKI, but has been compiled from various sources. It does not claim to be complete and correct. The colours shown are exemplary and do not correspond to the original colour shades. For changes and additions, please contact the webmaster of www.gs-classic.de.

SUZUKI parts numbers consist of 2 numbers blocks. If the parts are painted, a corresponding identification code is attached:
 Unpainted part
 Unpainted part
 Painted part (here 019 = Black)

Colours were used not only on individual models, but for many years on different ones. For the same colour code several different names were chosen (example: 264 = Pearl Orange, Summit Orange, Copper). There are also different colour codes for the same name (example: Candy Orange = 00Z and 138). Certain colours were also used for individual markets only and partly the name was adapted.

Decisive for the identification of a colour is always the colour code. If the code contains the number "0", this is also indicated by the letter "O" (example: 00A = OOA, Y09 = YO9) in different sources. If the code has a letter "1" at the beginning, this is also indicated in various sources by the English spelling "I" (example: 1AC = IAC). When searching in this list, always use "0" and "1".

3. Farbkombinationen

Meist sind die folgenden Farbkombinationen Zierlinien oder Aufkleber. Dies kann man feststellen, wenn die Zusammenstellungen aus Farben bestehen, die oben als "Tape" bezeichnet sind.

Colour combinations

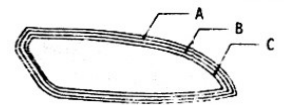

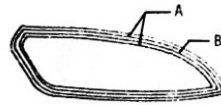

Usually, the following colour combinations are decorative lines or stickers. This can be seen if the compilations consist of colours, which are referred to above as "tape".

- D Innen / inside

3 Streifen / 3 stripes

- A Außen / outside
- B Mitte / center
- C Innen / inside

Ab den 80er-Jahren wurden zunehmend Mehrfarben-Lackierungen verwendet, die eigene Farbcodes bekamen. Die tatsächliche Zuordnung kann nur durch die Ersatzteilliste bestimmt werden.

From the 80s onwards, multicolour paintwork were increasingly used, which had their own colour codes. The actual assignment can only be determined by the spare parts list.
