

SUZUKI - Bereifungen für Mopeds, Motorroller, Motorräder, Trikes und Quads

Hinweise zur Benutzung:

Die folgende Liste gibt eine grobe Übersicht über die Bereifung vieler SUZUKI-Modelle. Sie ist keine Original-Suzuki-Liste und erhebt keinen Anspruch auf Richtigkeit oder Vollständigkeit. Die Bereifung kann je nach Land unterschiedlich sein. Die richtige ist den Fahrzeugpapieren zu entnehmen. Die Nennung der Hersteller ist nur informativ und keine direkte Empfehlung. Alle Angaben sind daher ohne Gewähr.

Empfehlung der Reifenhersteller

für bestimmten Reifentypen sind von Land zu Land unterschiedlich. Auch wird nicht garantiert, dass die empfohlenen Reifen zum jeweiligen Zeitpunkt in dem Land tatsächlich zugelassen sind, da sich die gesetzlichen Vorschriften ändern können. Vor Kauf und Montage eines Reifentyps solltet ihr euch bei Suzuki oder den Zulassungsstellen erkundigen, ob die empfohlene Bereifung auch wirklich OK ist!

Umrüsten

von Reifen, die nicht in den Fahrzeugpapieren aufgeführt sind, ist meist nur mit einer Freigabe möglich. Die erhaltet ihr bei Suzuki oder auch beim Reifenhersteller.

Reifenfreigaben

gibt es auf verschiedenen Wegen. Die Unbedenklichkeitsbescheinigung des Fahrzeug- oder Reifenherstellers muss nur mitgeführt werden und es kein Eintrag in die Fahrzeugpapiere erforderlich! Ein Teilegutachten wird bei Änderung der originalen Reifengröße erstellt und es ist eine Anbaubahnmessung durch einen amtlich anerkannten Sachverständigen erforderlich. Das Anbaubahnmesszertifikat muss auch immer mitgeführt werden. Bei einem Mustergutachten ist in Deutschland der Eintrag in den KFZ-Brief erforderlich (macht TÜV, TÜH oder DEKRA). Danach ist eine Änderung des KFZ-Scheins auf der Zulassungsstelle notwendig.

Abrollumfang

Der Abrollumfang ist die Wegstrecke einer Radumdrehung, bei 60 km/h nach DIN 70020. Er ist aus der Reifengeometrie nach den Richtlinien der ETRTO (European Tyre and Rim Technical Organisation) berechnet. Er kann je nach Hersteller und Reifentyp geringfügig abweichen.

Luftdruck

Der angegebene Luftdruck ist lediglich eine Empfehlung. Es gilt in der Regel der, in den Handbüchern des Herstellers angegebene Luftdruckwert. Achtung: Moderne Reifen erfordern in der Regel einen höheren Druck. Infos geben die Reifenhersteller.

Ergänzungen, Änderungen oder Fehler bitte über die Mailadresse auf gs-classic.de melden, damit die Liste verbessert wird.
